

Powerful and efficient with
3-phase AC drive motor

Extremely manoeuvrable
due to compact design

Maintenance-free gel battery
and integrated charger

Four mast heights available
(2.300 - 3.300 mm)

EJC M10 ZT

Electric stacker trucks (1,000 kg)

The EJC M10 ZT was specially developed for the internal transfer of lightweight goods. The 0.6-kW drive motor supports the transport of pallets and goods weighing up to 1000 kg over short distances.

The duplex mast, which is available in four different heights from 2300 to 3300 mm, makes the EJC M10 ZT ideal for occasional picking as well as the stacking of pallets. Advantageous for this is the low frame height of the EJC M10 ZT which ensures that even shorter operators have optimum visibility of

the fork tips. Its compact design and the short front-end length (L2) of just 535 mm also guarantee maximum manoeuvrability.

Thanks to the maintenance-free, powerful 3-phase AC motor, energy consumption is reduced and the best conditions are provided for rapid and cost-efficient goods throughput.

A gel battery used in conjunction with a built-in charger allows for flexible operation, without having to fill up the battery with water.

Benefit from the advantages

Centralized control instruments

High level of safety due to low ground clearance

Ergonomic designed tiller head

Optimized visibility through mast

Innovative drive and control technology

Motors with 3-phase AC technology offer many advantages and more efficiency while simultaneously reducing the operating costs thanks to the perfect match with our own controllers:

- High efficiency levels with excellent energy management.
- Rapid directional change without delay.
- No carbon brushes - maintenance-free drive motor.

Energy-efficient operation

Economic energy management increases the efficiency and lifetime of the battery and components:

- Intelligent automatic shut-off: After 30 minutes without use, the truck automatically shuts off.
- Energy recovery due to regenerative braking when decelerating.

Compact design and ideal view

Thanks to its compact design, the EJC M10 ZT is perfect for use in confined spaces.

- High manoeuvrability due to short chassis length.
- Optimum visibility of the fork tips at any height thanks to low frame height and optimised visibility through mast.
- Important instruments such as battery discharge indicator, hourmeter, emergency disconnect and key are centrally located on the truck.
- Sufficient storage space even with slender design.

Ergonomic operations

The truck is perfectly adapted to the ergonomic needs of the operator:

- Reduced force required while steering due to low-mounted tiller.

- Dual-sided operation of tiller handle for ergonomic and safe use.

Safe operation

Various safety measures reduce the risk of injury for operators and guarantee a high level of safety:

- Reduced risk of foot injuries due to low ground clearance of only 30 mm.
- Additional protection due to completely closed frame and optimised visibility on the mast.

Options

The EJC M10 ZT with duplex mast is available in the lift heights 2,300 mm, 2,500 mm, 2,900 mm and 3,300 mm.
