

Cost-effective operation due to double-deck lorry loading

Sideways travel improves performance in applications with regular direction change

Narrow design and maximum manoeuvrability

High speed and acceleration improving productivity

ESD 120/220

Electric stand-on / sideways-seated stacker (2,000 kg)

The Jungheinrich ESD 120 / 220 range of fork lift trucks are highly flexible trucks. As double-deck fork lifts they can lift two Euro pallets simultaneously with both mast and support arm lift: Ideal for loading and unloading HGVs with two tiers. The ESD 120 / 220 can also be used as a conventional fork lift in the warehouse.

The width of the ESD 120 stand-on truck is only 760 mm, which is narrower than a Euro pallet. This allows for easy pallet positioning inside an HGV as well as for rapid loading and unloading. The fold-up seat offers additional comfort when travelling over longer distances. It acts as a comfortable backrest when folded up. The low entry height assists frequent entry and exit. The 820 mm wide ESD 220 is a pure sitdown truck, giving the operator maximum comfort. It is therefore particularly suited to

travelling over long distances. The adjustable foot-well height ensures a relaxed working position for all operators.

All trucks are fitted with powerful 24 V drive motors for rapid acceleration and high top speeds. The robust design also offers particular advantages: The frame and load sections are designed for capacities up to 2000 kg. Other advantages:

- Rapid travel speeds and acceleration.
- Extremely durable frame for exceptionally high operational demands.
- Display with steering position display and travel program selection (optional on the ESD 220).
- Electric steering for easy manoeuvring with a few turns of the steering wheel.
- Excellent energy management for low operating costs.

¹⁾ Diagonal in accordance with VDI: + 211 mm

²⁾ Diagonal in accordance with VDI: + 213 mm

³⁾ Load section lowered: + 78 mm

⁴⁾ Load section raised / lowered: + 90 mm

⁵⁾ Mast lift capacity: max. 1 t

Benefit from the advantages

Grab handle for safe access and for the fitting of various options

ESD 120: Control panel for speed regulation and lift function

Activated initial lift

Comfortable seating position with height-adjustable footplate

Innovative 3-phase AC technology

Better performance simultaneously combined with reduced operating costs. Your advantages (for ESD 220):

- High level of efficiency with excellent energy management.
- Powerful acceleration.
- Rapid direction change.
- No carbon brushes – maintenance-free drive motor.
- Two-year warranty on the drive motor.

Productivity-enhancing ergonomics

The layout of the operators cab, which is sideways on to the travel direction ensures high visibility and reduces potential neck complaints. A safety switch in the foot well ensures maximum safety.

ESD 120

- Fold-up seat acts as a backrest when the driver is standing.
- Footrest for better support when seated.

ESD 220

- Comfort seat with weight adjustment.
- Padded armrest.
- Padded knee cushion.

Travel comfortably and safely

Safe speed regulation with SpeedControl, this ensures maximum safety and simple travel speed control in all situations.

- Roll-back protection on gradients with automatically activated brake.
- Constant travel speed on up and down gradients.
- Energy recovery with regenerative braking.
- Smooth, jerk free operation.

Flexible options

ESD 120

- Transport of two pallets simultaneously with double-deck load section.
- Rapid loading and unloading of HGVs.
- Easy pallet positioning directly on HGV side wall due to narrow truck width of 760 mm.
- Comfortable entry and exit due to low entry height.

ESD 220

- Drive and lift control via multifunction lever
- Comfortable seat makes it ideal for long distances.

- Easy manoeuvrability due to compact design.
- Ideal for block stacking.

Powerful battery

ESD 120

- Short battery compartment: 3 PzS 375 Ah.
 - Long battery compartment: 4 PzS 500 Ah.
 - Lateral battery exchange
- ### ESD 220
- 3 PzS 465 Ah.
 - Lateral battery exchange.

Options

- Different load wheels (depending on the application).
- Cold store version.
- Code lock.
- Steering wheel on the left (ESD 120).
- Load guard.
- Battery discharge indicator and steering position display (optional on the ESD 220).
